Backtesting Summary

Metric	Value
Model Type	Monte Carlo VaR
Confidence Level	0.95
Backtesting Period	245.00
Observed Exceptions	2.00
Expected Exceptions	12.25
Breach Rate	0.82%
Kupiec Test Result	Reject(Over-conservative)
Model Status	PASS

Model Interpretation and Risk Insights

The VaR model is conservative, with a breach rate of 0.82% versus the expected 5%, indicating an overestimation of risk. Backtesting falls within the Basel Green Zone, confirming acceptable model performance. However, the use of normal distribution may limit the capture of extreme tail events.
